INTRODUCTION

ABOUT DIGITAL DESIGN TEAM

Digital Design team is a part of the Omnichannel Operations team located in Zagreb Croatia, which is one of the streams within the Global Digital Commercial team. It consists of a handful of Digital Design experts ready to help you with your design needs.

WHAT SERVICES DO WE PROVIDE?

The services we offer include a wide range of various visual assets made for a digital environment or print purposes. Those are listed under the **'Digital Assets'** and **'Print Assets'** chapter.

As the request for our services expands in volumes and complexity, we developed new optimised service offerings (under **'Additional Services'** chapter), which are complex and hybrid in their nature, and combine digital and print needs, and ultimately provides a consolidated Omnichannel Operations services approach.

HOW IS THIS CATALOG ORGANIZED?

- Each of the **main three chapters** is divided into a few **subcategories** for easier content navigation.
- Each **design service/offering** has its own explanation, time estimation and level of complexity shown for establishing clear expectations.
- **'Client info'** section at the beginning of this catalog will provide you with the information for better understanding of design services and more efficient communication and collaboration with the Digital Design team.
- In the **'Document briefs'** section at the end of the catalog you will find links to useful documents (**design brief templates** for different purposes) you are invited to download, fill out and share with the Digital Design team when starting a task to ensure everything runs efficiently.

CLIENT INFO

TIME ESTIMATION

Time estimation for each task can vary depending on the task complexity, brief and raw design materials provided and always refers to working days only. It also depends on number of visuals needed, team's available resources and doesn't include the time for modifications based on the client's feedback.

COMPOSITION (ARRANGEMENT OF ELEMENTS)

While resizing the image formats, please keep in mind that the positions and the proportions of the elements can't and won't stay the same (based on the format's size, orientation, text readability etc.). However, we will make sure that the main idea and "feel" of the design transfers to the new format, while respecting the brand guidelines (if provided).

DIMENSIONS

The standard in expressing dimensions is width x height, i. e. 1080x1920px is a portrait format, while 1920x1080px is a landscape format. Please use this standard to avoid confusion and extra work.

DIGITAL VS. PRINT PURPOSES

Almost any digital asset can be adjusted for printing purposes (with the exeption of newsletters, e-mails, cloudpages, landing pages that exist only in a digital environment). For print purposes you will need to provide info about format (dimensions) and printing technique. Accordingly, most of the assets listed in the 'Print assets' category can be delievered as digital formats (.jpeg, .png, .pdf) for online distribution.

HOW TO GET IN CONTACT?

Digital Design team works closely with Project Managers to ensure everything goes smoothly (communication, planning, organization, time resources and management). Each project manager is dedicated to a specific market, and you can find more info about their services **here.**
Preferable is that initial and all client communication goes through 'Client Services and Digital Projects' team, so that everything is well documented and maintained.

HOW TO START A NEW TASK/PROJECT?

Starting a new task/project demands raising a ticket from the Smartsheet service or contacting one of our PMs.

IMAGE FORMAT (STATIC)

Offering	Scope of work included	Time estimation*	Complexity level		
ICONS	New icons creation (up to 15 icons)	1 day	▲		
	Adjusting existing icons	1 day**	▲		
BANNERS	New banners creation (various purposes)	3 days			▲
	Adjusting existing banners (dimensions/orientation,...)	3 days**	▲		
SOCIAL MEDIA ASSETS	Making assets for social media posts (up to 10 assets)	3 days			▲
	Adjusting existing social media posts	2 days**	▲		
PHOTOS	Resizing photos (up to 20)	1 day	▲		
	Editing photos	3 days	▲		
	AI generating photos	2 days		▲	
LOGOS	Making a simple logo for campaigns/initiatives	5 days			▲
	Adjusting an existing logo	2 days**		▲	
INFOGRAPHICS	New infographic creation	7 days			▲
	Adjusting existing infographic	4 days**		▲	
3D MODELS	Packshot creation - medicine packaging mock-up (up to 10)	2 days		▲	
	Mock-up creations (products on shelf preview / presentation packaging for pharmacy advertising purposes / POS materials)	5 days			▲
QR CODES	Generating new QR codes	1 days	▲		
			LOW	MEDIUM	HIGH

* Time estimation can vary depending on the task complexity, brief and raw design materials provided and always refers to working days only

** Estimation applies in case open files are provided

IMAGE FORMAT (INTERACTIVE)

Offering	Scope of work included	Time estimation*	Complexity level		
PDF FORM	Creating a clickable form (up to 10 pages)	3 days	▲		
HTML5 BANNERS	New banner creation – up to 4 dimensions	7 days			▲
	Adjusting existing banners (dimensions/orientation,...)	5 days**			▲
3D MODELS	Interactive packshot creation (clickable medicine packaging mock-up)	20 days			▲
NEWSLETTER	Making a new newsletter layout and assets for it	5 days		▲	
	Adjusting layout for existing newsletter	3 days**		▲	
			LOW	MEDIUM	HIGH

* Time estimation can vary depending on the task complexity, brief and raw design materials provided and always refers to working days only
** Estimation applies in case open files are provided

MULTI-PAGE FORMAT

Offering	Scope of work included	Time estimation*	Complexity level		
POWERPOINT	Making PowerPoint presentation decks up to 10 slides	5 days	▲		
	11 to 20 slides which contain various custom-made graphic elements or charts	10 days			▲
	21 to 40 slides which contain various custom-made graphic elements or charts	15 days			▲
	41+ slides which contain various custom-made graphic elements or charts	20 days			▲
PDF/E-BOOK FORMAT	Making pdf files for various purposes (digital/print preparation) up to 10 pages	5 days	▲		
	11 to 20 pages	10 days			▲
	21 to 40 pages	15 days			▲
	41+ pages	20 days			▲
			LOW	MEDIUM	HIGH

* Time estimation can vary depending on the task complexity, brief and raw design materials provided and always refers to working days only

TEMPLATES

Offering	Scope of work included	Time estimation*	Complexity level		
SOCIAL MEDIA POSTS TEMPLATES	Making templates for social media posts (PPT where text localization can be done)	**7 days**			▲
NEWSLETTER TEMPLATES	Creating newsletter templates for various purposes	**5 days**			▲
POWERPOINT TEMPLATES	Creating PowerPoint presentation templates up to 10 slides	**7 days**			▲
	11-20 slides	**10 days**			▲
	21+ slides	**15 days**			▲
			LOW	**MEDIUM**	**HIGH**

* Time estimation can vary depending on the task complexity, brief and raw design materials provided and always refers to working days only

UX/UI SERVICES

Offering	Scope of work included	Time estimation*	Complexity level		
			LOW	MEDIUM	HIGH
CLOUDPAGES LANDING PAGES	Creating static and dynamic page elements in-line with the brand/campaign	5 days		▲	
	Making design mock-ups/wireframes for cloudpages, landing pages	5 days		▲	
E-MAIL CAMPAIGNS	Creating e-mail elements and assets in-line with the campaign	5 days		▲	
	Making design mock-ups/wireframes for e-mail campaigns	5 days		▲	
TWS PAGE MIGRATIONS**	Creating page elements and assets in-line with the brand	7 days		▲	
	Making mock-ups for TWS page migrations	14 days			▲
CONSULTING	Consulting services for best UX practice on existing or new projects	7 days			▲

**in collaboration with Web Platforms Configuration team and Digital Analytics team

* Time estimation can vary depending on the task complexity, brief and raw design materials provided and always refers to working days only

VIDEO FORMAT

Offering	Scope of work included	Time estimation*	Complexity level		
VIDEOS	Resizing/adjusting videos (dimensions/orientations)	7 days**			▲
	Editing videos (adding titles / adding voiceover / adding transition frames and elements)	7 days			▲
VIDEO SCREEN RECORDINGS	Making a screen recording of an internal process/sofware	7 days			▲
SOFTWARE/PLATFORM STEP-BY-STEP TUTORIAL	Making a screen recording of an internal process and making a video with instructions	7 days			▲
ANIMATED BANNERS	Making an animated banner from a static visual	5 days			▲
	Adjusting an existing banner	3 days**			▲
LOGO ANIMATIONS	Making logo animations	7 days			▲
ICON ANIMATIONS	Making an animated graphic of an icon (short/simple video file, e.g. gif)	3 days			▲
COMPLEX ANIMATIONS	Making short reels for social media for various purposes	7 days			▲
	Making a more complex animated video (creation of all animated elements included in the final product) (gif/mp4) – a detailed process is featured on page 13	20 days			▲
	Resizing/adjusting existing animations (gif/mp4)	7 days**			▲
			LOW	MEDIUM	HIGH

* Time estimation can vary depending on the task complexity, brief and raw design materials provided and always refers to working days only
** Estimation applies in case open files are provided

ADDITIONAL SERVICES

Additional services include a mix of digital/print projects and advanced services that take more time and attention

UX BUNDLE
(complete UX service)

EVENT SUPPORT
(digital/print)

VISUAL IDENTITY

UX BUNDLE (COMPLETE UX SERVICE)

Offering	Scope of work included	Time estimation*	Complexity level
UX BUNDLE (complete UX service) Providing a comprehensive UX/UI service when creating a website, mobile application or any digital product from scratch. The final product is developed as a joint project and a collaboration of different OmniOps teams. Inludes phases: 1. Research phase 2. Mockup phase 3. Test phase 4. Implementation phase	**Research phase**		
	Gathering all the data collected from the local market	14 days	▲
	Analyzing research data to generate actionable insights, pain points and user goals		
	Discussing project goals, expectations and requirements		
	Defining and clearly articulating problem statement		
	Mockup phase		
	Organizing and structuring the content to make navigation intuitive for users (Information Architecture)	14 days	▲
	Sketching and creating low-fi mockups/wireframes		
	Creating hi-fi mockups		
	Defining visual elements and creating UI assets that support and enhance intended brand communication		
	Creating interactive prototypes		
	Refining mockups based on feedback		
	Preparing design specifications and guidelines for developers to follow during the Implementation phase		

LOW | MEDIUM | HIGH

* Time estimation can vary depending on the task complexity, brief and raw design materials provided and always refers to working days only

UX BUNDLE (COMPLETE UX SERVICE)

Offering	Scope of work included	Time estimation*	Complexity level
UX BUNDLE (complete UX service) Inludes phases: 1. Research phase 2. Mockup phase 3. Test phase 4. Implementation phase	**Test phase**		
	Gathering information collected through Usability testing and A/B testing conducted with real users on a local market	14 days	▲
	Gathering feedback from stakeholders		
	Documenting usability issues		
	Making adjustments to the design based on test results and user feedback		
	Implementation phase		
	Providing all the necessary design assets, specifications, and style guides to the development team	14 days	▲
	Collaborating with developers to ensure the implementation aligns with the design vision, providing clarification or adjustments as needed		
	Continuously updating and improving the final product based on user feedback, behavior, and evolving needs		

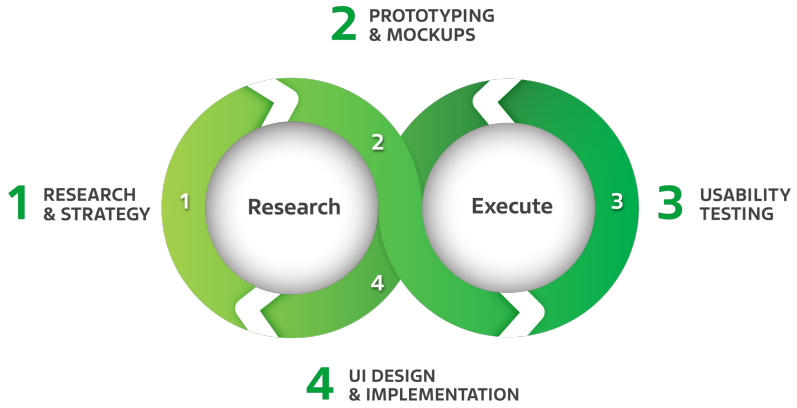
LOW | MEDIUM | HIGH

* Time estimation can vary depending on the task complexity, brief and raw design materials provided and always refers to working days only

UX BUNDLE (COMPLETE UX SERVICE)

UX BUNDLE
(complete UX service)

1. Research phase	2. Mockup phase	3. Test phase	4. Implementation phase
The research phase is focused on understanding users, their needs, and the problem to be solved. It involves gathering data to inform design decisions.	In this phase, ideas begin to take shape as sketches, wireframes, and mockups that will visually represent how the product will look and function.	This phase focuses on validating the design decisions made in the mockup phase through user testing and feedback collection.	In this phase, the design gets handed off to developers, and the focus shifts to building, launching, and continuously improving the product.
Conducted on a local level (could include Stakeholder Interviews, User Interviews, Competitive Analysis, Surveys and Questionaires, Personas Creation, User Journey Mapping, etc.)	OmniOps Design team creating mockups and visual solutions based on the available data and detailed brief	Testing should involve both OmniOps and test group formed locally	OmniOps will provide all the necessary assets and design files approved in the previous stages
Local market to provide data and information relevant for the next step	OmniOps consulting other parties involved (IT) on possible limitations of the systems used or creation of new components (EPI, SFMC, etc.)	OmniOps to apply changes gathered in the feedback document and create updated solutions	Depending on the application used, responsible teams should apply new solutions to corresponding systems



EVENT SUPPORT

Offering	Scope of work included	Time estimation*	Complexity level
EVENT SUPPORT (digital/print) Providing integral design support to an event or a congress by developing all the necessary event materials and advising clients on all design related questions and concerns.	Collecting all the necessary info about the event during the initial call and gathering the existing materials or brand guidelines if available	45 days	LOW / MEDIUM / HIGH ▲
	Providing on-site support for the lookbook creation – pre-event site visit if necessary and possible		
	Creating the lookbook with all the signage placement (both digital and print) for Veeva approval		
	Developing of event materials (digital and print assets) following predefined event/congress guidelines		
	Amends to event materials based on feedback and technical specifications		
	Finalizing the materials and packaging of source files before the event		

* Time estimation can vary depending on the task complexity, brief and raw design materials provided and always refers to working days only

VISUAL IDENTITY

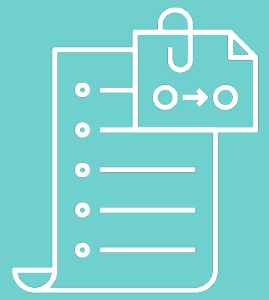
Offering	Scope of work included	Time estimation*	Complexity level
VISUAL IDENTITY Creating a meaningful, flexible and adaptive visual identity for a brand, campaign or initiative from scratch. Involves building a brand's image, tone and general style while creating consistent, recognizable visuals that communicate its values and personality.	Gathering insights from the client and going through the brief – can be done during the initial call to settle down on important issues	30 days	▲
	Reviewing existing materials, competitors and market trends		
	Understanding the brand's/client's mission, values, goals, target audience, and competition		
	Creating a moodboard (collections of inspiration to set the design direction) and identifying key characteristics such as tone, style, and personality		
	Developing a primary logo and variants (horizontal, vertical, icon-only)		
	Creating custom iconography, visual patterns or elements that support the identity (if needed)		
	Presenting the visual identity options (up to three) to the client		
	Collecting the feedback and refining the design		
	Creating a brandbook or style guide to ensure consistent visual communication (clear guidelines on how to use the logo across various platforms (size, spacing, color, etc.)		

LOW MEDIUM HIGH

* Time estimation can vary depending on the task complexity, brief and raw design materials provided and always refers to working days only

BRIEF DOCUMENTS

Download design briefs
for various purposes



BRIEF DOCUMENTS

WANT TO KICK OFF A TASK/PROJECT WITH US?

We can't emphasize the importance of a clear and concise brief enough.
The documents on the links below contain detailed brief templates that will help you draft a well written brief for different purposes.

When writing a brief please try to be as much precise as you can.
A completed brief will give us thorough info and expectations concerning your task or a project.

GENERAL DIGITAL DESIGN BRIEF

VIDEO BRIEF

EVENT SUPPORT BRIEF

THINGS TO INCLUDE ALONGSIDE A COMPLETED BRIEF

Here is a suggested list of materials to provide alongside a completed brief:

– any raw materials that you have (open files, high resolution photos etc.)
– ideas or creative directions about design/concept (can be examples from the web)
– existing examples if new design must fit into an established design system
– brand book if task is not Teva branded

THANK YOU!

For any further clarification on the topic, please contact us via:
